Image Quality			Average 6.1		

PHOTO TIPS

- Use natural side lighting from a window — it creates flattering shadows and adds depth
- Clear the background; a plain white or dark wall removes visual distraction
- Shoot from a slightly lower angle to maximise perceived length

FINAL WRITTEN VERDICT

This submission presents a well-proportioned specimen with notably above-average girth and strong erection quality. The hardness score is the standout metric, suggesting excellent presentation readiness. Minor compositional issues — particularly the distracting background and partial frame cutoff — limited the photo evaluation score. Overall, a solid result with clear visual strengths.
