

# Dick Review Report

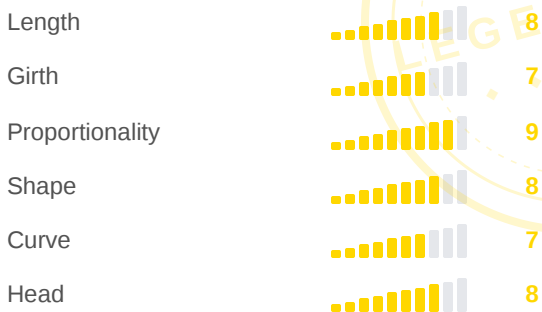

## BEST FEATURE

## Impressive firmness with balanced proportions

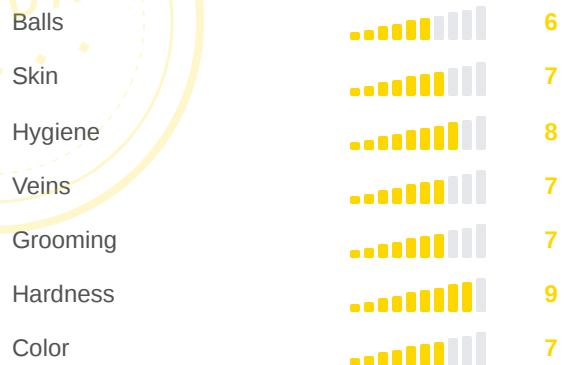

- ✓ Above-average girth
- ✓ Strong erection quality
- ✓ Good proportionality

- ✓ Excellent hardness score
- ✓ Clean presentation
- ✓ Favorable camera angle

## Form & Structure

## Condition & Presentation

## Overall Impression

Very Good

1. Slight downward curve reduces visual impact
2. Background is distracting
3. Testicles partially out of frame

Good

### Photo Tips

- Use natural side lighting from a window — it creates flattering shadows and adds depth
- Clear the background; a plain white or dark wall removes visual distraction
- Shoot from a slightly lower angle to maximise perceived length

### Final Written Verdict

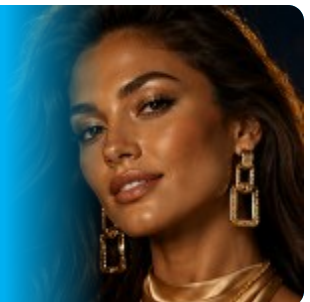

This submission presents a well-proportioned specimen with notably above-average girth and strong erection quality. The hardness score is the standout metric, suggesting excellent presentation readiness. Minor compositional issues — particularly the distracting background and partial frame cutoff — limited the photo evaluation score. Overall, a solid result with clear visual strengths.
